

Andrew Liu

Junior UI/UX Designer

EXPERIENCE

AdaptX

Jan 2025 – May 2025

UI/UX Design Fellow

Boston, MA

- Partnered with AdaptX, a startup focused on improving fitness for impaired athletes, to design the platform’s mobile user experience.
- Conducted user surveys and competitive analysis of 5 fitness platforms to uncover key pain points of existing apps.
- Led the end-to-end design process — from early ideation and low-fidelity sketches to 20+ high-fidelity wireframes and an interactive prototype showcasing the primary in-app flow.
- Designed a Figma design kit with reusable components and shared styles, improving design consistency and handoff efficiency.
- Collaborated with a cross-functional team of designers and project managers to align design goals with project objectives and deliver a polished MVP by project’s end.

Mob

May 2024 – Aug 2024

Frontend Engineer Intern

Boston, MA

- Contributed to the end-to-end development of Mob, a greenfield mobile app designed to make discovering and attending local events more social and engaging.
- Built the frontend in React Native with TypeScript, implementing 15+ core screens and integrating key app logic, navigation, and user flows.
- Collaborated with UI designers to translate wireframes into responsive, production-ready components.
- Delivered a fully functional prototype within 6 weeks, enabling the team to begin backend development ahead of schedule.
- Participated in weekly agile sprints and code reviews, improving app performance and UI consistency through iterative feedback.

PROJECTS

Uniview

Jan 2024 – May 2024

- Conducted user research, including creation of user personas and stories, and performed competitive analysis.
- Designed intuitive, user-centric interfaces using Figma, producing hi-fi wireframes and a clickable prototype for a unified television streaming platform.
- Iterated on prior designs based on feedback from usability testing participants to improve user flow.
- Practiced user-centric design and five-stage design thinking process.

Instasport Android App

Oct 2023 – Dec 2023

- Designed a clean and intuitive interface for an Android mobile app in Figma, with a focus on improving design thinking and developing Figma skills.
- Translated hi-fi wireframes from Figma into functional frontend interface for the app in Kotlin using Jetpack Compose and Material UI.
- Led weeklong Agile sprint planning and task management.

SKILLS

Hard Skills

- Wireframing & Prototyping
- Information Architecture
- User Research
- Usability Testing
- Visual Design
- Responsive Design
- Interaction Design
- Accessibility (WCAG, inclusive design)
- Frontend Development

Techniques

- User Research & Interviews
- Persona Development
- Journey Mapping
- Design Thinking & Sprints
- Agile & Cross-Functional Collaboration

Tools

- Figma & FigJam
- Framer
- Photoshop
- Illustrator
- Notion
- Jira

EDUCATION

Boston University
Bachelor of Arts, Computer Science
Graduated May 2025
Awards: Dean’s List, Fall 2023

CERTIFICATIONS

Google
Foundations of User Experience (UX) Design
Issued Oct 2025
